February, 2011 TCC Technology (TCCT), together with the Asia Data Center Alliance (ADCA), has set up an event in **"the Pacific Telecom Conference 2011 (PTC' 2011)" in Honolulu, Hawaii.** The event was held on February 14, 2011 in the Hilton Hawaii Village Beach Resort. During the event, participants from around the world--Asia, Europe, Australia, and the United States--were exclusively invited to celebrate and welcome the newest alliance member, HKCOLO, a Hong Kong-based IT service company, into the Asia Data Center Alliance (ADCA).February, 2011 TCC Technology (TCCT), together with the Asia Data Center Alliance (ADCA), has set up an event in **"the Pacific Telecom Conference 2011 (PTC' 2011)" in Honolulu, Hawaii.**
The event was held on February 14, 2011 in the Hilton Hawaii Village Beach Resort. During the event, participants from around the world--Asia, Europe, Australia, and the United States--were exclusively invited to celebrate and welcome the newest alliance member, HKCOLO, a Hong Kong-based IT service company, into the Asia Data Center Alliance (ADCA).

Asia Data Center Alliance (ADCA) offers a One-Stop-Shop to clients who need a suite of Data Center services in Asia. The alliance consists of:Asia Data Center Alliance (ADCA) offers a One-Stop-Shop to clients who need a suite of Data Center services in Asia. The alliance consists of:

- 1-Net   Singapore (Singapore);
- CMC Telecom (Vietnam);

- The Aims Asia Group (Malaysia);

- HKCOLO (a new member from Hong Kong); and

- TCC Technology (Thailand). 1-Net Singapore (Singapore).

The addition of HKCOLO brings the ADCA to another step of providing unique cross-border services to customers. Benefits to customers include easy access to reliable and best-practice based regional Data Center services and cross-border DR services to facilitate new business development.   Companies from around the world at the event expressed great interest in expanding current service offerings in other markets to Asia, including cutting-edge internet phone, "cloud" based application and digital content development, as well as regional internet exchange which will lead to additional IT market competitiveness in all five member countries.
